

1. We are planning to develop "Computer Hubs" - places where people of all ages can learn to use computers better, particularly to earn income from their skills. We are planning to have up-to-date computers with a wide variety of software so that people of all ages can learn whatever is needed to earn better incomes doing computer work that they can handle, all the time while living and working in Tairawhiti. We are planning to make opportunities for people to learn from each other, tuakana teina, as well as having instructors. We are planning to make it possible for people, as they learn more, to earn money for their skills - even while they are still learning.
